Number 15

First Meeting of Newly Elected Town Council

Strike Standing Committees For The Present Year

Redcliff's new Town Council for 1936 held its initial meeting last Monday evening. The Mayor and newly elected councillors were sworn in and proceeded to business.

The returning officer F. Baird showing the mayor and members of the council and School Board elected at the town elections, was received and filed.

The personal of the new council is as follows: Mayor, H. M. Sangster and councillors Newnam, Rindahl, Moore, Lrvle, Evans and Hope.

The request from the school board for \$1,100 for school purposes, was granted.

The second and fourth Mondays of each month was selected as council meeting night.

The appointment of committees was left to the Mayor on motion of Brydie and Rindahl.

The following committees were appointed and endorsed by council.

Finance — Newnam, Moore and Brydie.

Water — Brydie, Hope and Rindahl.

Public Works — Moore Evans and Hope.

Fire and Light — Hope Rindahl and Newnam.

Licenses and Police — Evans, Newnam, Brydie.

Sanitary — Rindahl, Moore Evans.

Relief — The whole council.

Building — The whole council.

Deputy Mayor — A. Brydie.

Building Inspector — F. Broughton.

Board of Health — Dr. Ward.

Rev R E Pow, Rev H S Hammett, W Pickering and J Kitchen.

Sanitary Inspector — J Kitchen.

Instructions were given to secure prices for making a complete assessment of the town, on motion of councillors Rindahl and Brydie.

On motion of councillors Rindahl and Brydie the Mayor and secretary were appointed to sign all town documents and in the absence of the Mayor the deputy Mayor.

On the suggestion of Mayor Sangster an invitation was extended to the federal and provincial members to attend council meetings if they have any matters in the interests of town, to discuss.

The Secretary was instructed to request the Medicine Hat hospital to notify the Town office when patients from town are admitted to hospital, to be a charge against the town.

Total number of foreign automobiles entering the Dominion was \$600,000, compared with \$261,848 in 1934, an increase of \$338,152.

A parliamentary investigation of the operations of the new wheat board will be held this season, it was announced in the house of commons by Trade Minister Euler. It was requested by Conservative Leader Bennett and immediately granted by Mr. Euler.

Ranchers Worrying About Feed Problem

Hard To Get Feed On Account Of Conditions of Roads

With the thermometer registering as low as minus 45 and the ranges covered with deep snow, the hat ranchers are waiting for a break in the weather.

No actual cattle sales have been reported to date but it is rumored that north of the city near Jenner, Empress and Bindloss, some stock is down.

It is also understood that north western districts from the Hat are suffering heavy sheep losses. Extensive feeding has been necessitated over the southern part of the province and ranchers who thought they had stored ample supplies for the winter are watching it dwindle away.

On account of the condition of the roads and the extremely cold weather ranchers claim that if weather continues much longer it will be impossible to get feed for "love or money" and that hundreds of cattle would die on the range.

Prospects are Good Near The Montana Boundary

The year 1936 promises to be a big year in Alberta oil. With operators testing both the upper and lower geological levels for a new crude oil, reservoir history should be written before the snow flies next fall. Bringing in a 1,000 barrel well in the "B" Bank field in Montana by "Tip" O'Neill has opened up a new era in oil operations in the Montana Alberta region.

Alberta operators see no reason why the drill should not bring in greater production on the Alberta side and they are going to back up their faith with works. This will be an important year in the race for production.

Teachers May Have To Join Association

Will Introduce Measure in The Legislature

Compulsory membership of teachers in a province wide professional organization will be the aim of a bill to be brought down in the Alberta Legislature by a private member within the next few days, it was indicated as Premier Aberhart met a delegation representing the teachers' union committee of the Alberta Teachers' Association. The Premier did not state whether the government would support the bill.

Under the proposed plan, all teachers in the province must belong to the organization before they can secure a position at any school board.

"Warm and sincere appreciation of the services of John I. McFarland to agriculture during the past five years, is expressed in behalf of the United Farmers of Alberta in a letter written by Norman F. Priestly, Vice-President of the U.F.A. to Mr. McFarland a few days ago.

Former British Admiral Seriously ill

EARL BEATTY

First Admiral of the British Fleet, whose command in following a recent, has caused anxiety in London. A heart specialist was called in and now an expert ventricle is reported.

SCHOOL NEWS

The High School Literary Society met on the 12th for its weekly meeting. The first round of the Oratorical Competition for next year took place. The speakers were all the year students. The latter part of the program was a limerick writing competition. Fifty cents was his prize for the winner. The following is the prize winning limerick written by Annie Bolton.

"I've a new premier, I'm told, Who soon will be sixty years old, Says: 'Social Credit!' I say: 'You said it' He'll say: 'He'll be recalled!'"

On Feb 19th there will be a dramatic competition between the three literature classes and the French II class. Grades 6 and 8 will be invited to see it and a silver collection will be taken up.

Invitation to Join Philharmonic Soc.

Those wishing To Join Leave Names at Review Office

An invitation has been extended to the citizens of Redcliff to join the Medicine Hat Philharmonic Society which is now preparing for Mendelssohn's "Elijah" to be presented in the future. There will be no fee for joining. This will be a splendid opportunity for those who enjoy singing to get some good training in high class music. Any who wish to join should leave their names at the Review office and arrangements will be made for transportation.

Former Teacher Here Dies at Claresholm

Mr Karl Martin

Mr Karl Martin, who was principal of the school here in 1915, died suddenly at his home at his home in Claresholm a week ago, last Monday, Feb. 10th. Deceased had been at a meeting Monday during the very cold spell and on arriving home for supper he collapsed while entering the house and passed away before medical aid arrived. He was 62 years of age and is survived by his wife and five children.

MARKED INCREASE IN CATTLE EXPORTS

The total exports of cattle from Canada during 1935 reached 112,771 head, the largest movement in several years. Of the total, approximately 100,000 went to the United States. Compared with 1934, exports showed an increase of almost 100 per cent at all points, while those to the United States alone were six times greater. During 1935, over 21,000 calves were exported, as compared with 1,202 in 1934. These figures indicate that the export market was a much stronger factor than in the previous year.

Income tax collectors in the 10 months of the fiscal year ended Jan 31st amounted to \$77,230,405, and increase of \$19,749,664 compared with the corresponding period of the previous year.

Badminton Juniors Make Good Showing

Redcliff Wins Three Out Of Five Events

In the junior district badminton tournament held in Medicine Hat last week Redcliff made a good showing, winning three out of five events.

In the mixed doubles Bruce Collard and Kaja Madsen won.

The girls' double was won by Kaja Madsen and Carol Selhorn. The final in the girls singles is between two Redcliff girls Kaja Madsen and Carol Selhorn.

RANDOM SHOTS

I shot an arrow into the air; It fell in the distance I know not where, till a neighbor said that it killed his calf, and I had to pay him 6 and a 1/2.

I bought some poison to slay some rats, and a neighbor swore it killed his cats. And rather than argue across his fence I paid him 4 dollars and 50 cents.

One night I set a trap for a bad boy and hoped it would soon till it reached the moon. But the candle fell on a farm's straw, and he said I must settle for so to law.

And that is the way with the random shot—it never hits the proper spot. And the joke you spring, that you thought so smart, may leave a wound in some fellow's heart.

A STAGGERING COST

The cost of the World War, according to the estimates made recently by experts, was \$337,346,183,657. America's share of that cost amounted to \$41,765,000,000. The total cost of the war would have provided \$2,500 cottages on 5 acre plots of land costing \$100 an acre for every family in Great Britain.

America, Canada, Germany, Belgium and Russia. With what the United States spent in half a year during the war, an automobile and a tractor could be bought for every one of our 1,500,000 farmers with \$600,000,000 left for good roads.

ALBERTA TO MEET BIG DEBT THIS YEAR

Premier Aberhart and Hon. J. A. G. Stewart, provincial treasurer, will leave for Ottawa as soon as possible after the current session of the legislature is concluded, to confer with federal government authorities on the question of meeting \$21,000,000 in provincial debt obligations which come due this year.

Little Theatre show will be held Friday if weather keeps fine, we understand.

Bruno Hauptmann's electro-nation has been set once more. This time it is for the week of March 30th. This is the third time an execution date has been set for the convicted murder of baby Lindberg.

For spending approximately \$4 days in Alberta in 1934-35 a connection with Social Credit.

Major C. H. Douglas, of London, England, reconstruction advisor to the provincial government, received \$6,449 in fees and expenses.

ST. MARY'S CHURCH

Mass will be celebrated on the 3rd Sunday of each month at 8:30 a. m.

ST. AMBROSE CHURCH

Rev. H. S. Hammett, Vicar.

Sextagesimal Sunday Feb 16

No 8 o'clock celebration.

11:00 a. m. Choral Eucharist

7:30 Evensong.

CHURCHES

MEMORIAL (UNITED) CHURCH

Pastor: Rev. R. Enskine Fox

Sunday Feb. 23rd 1936.

10 a. m. Choral School

11:15 a. m. Morning Worship

Subject: Jesus at the Pool of Bethesda.

7:30 p. m. Evening Worship

Subject: Know Thyself.

The greatness of Burns is to be measured by what he suffered, overcame and accomplished.

Any Time is Tea Time

The Farm Problem For 1936

At this time of the year farm owners, farm operators and others interested in agricultural production are necessarily giving a great deal of thought and attention to the all-important problem of what to raise and how much to produce during the 1936 season.

Time was when this problem, if it was a problem at all, was a comparatively simple one. All that was necessary to do was to divide the land already prepared and the additional acreage to be prepared in the spring into two portions, one area to be seeded to wheat and the other to oats, with some provision for a small plot for vegetables for household use. In those days there were one or two standard varieties of wheat and oats and all the farmer had to plan in advance was which of these he would seed, and when the spring came to go ahead and seed it. Having done this, his chances of reaping a fair crop yielding him a reasonable return for his labor were pretty good.

But those days are gone and probably gone forever. Down the corridor of the past two decades, the problem of what to raise and how much of it has become more complex with each succeeding year, and to-day the question bristles with so many complications and ramifications as to require the vision of a Solomon and the acumen of the proverbial Philadelphia lawyer, plus the insight of a skillful prognosticator if a reasonably satisfactory answer is to be the outcome.

If the farm operator in the prairie provinces wants to eliminate the gamble from his farming activities, he must not only be an expert enough tiller of the soil and husbandman, but he also needs to be a student, a scientist, an economist and a meteorological expert. In other words he must achieve the unattainable.

When preparing his plan for the year's work the farmer not only has to take into consideration the condition of his land, the state of its suitability and preparedness for various types of crops, the probable availability of the kind of seed he would like to sow, the nature and extent of the hazards to which various crops and varieties may be subjected to deterioration and loss by insect pests and diseases, the probable effect of prospective weather conditions on the various crops, the nature and extent of the markets required by different types of crops, the probable demand for the resultant yield in the local and world markets but many other factors which, for lack of space, must be dismissed in the succinct phrase "too numerous to mention."

Many of these questions the farmer, because of his own circumstances and local conditions must decide for himself by very little assistance from outside sources, but fortunately he can rely on his own efforts to weigh probabilities and prospects of the effect of market trends, market conditions, national policies and to some extent even of international statistics and relations on his intended activities, but even the information available on these factors can only be a guide, subject as they are and more particularly in recent years, to great and rapid fluxes.

One of the most valuable of these guides, entitled "The Agricultural Situation and Outlook, 1936" has just been issued by the Dominion department of agriculture with the co-operation of the department of trade and commerce. The information it contains is compiled by the sub-committee on the agricultural outlook of the National Advisory Committee on Agricultural Services.

The government pamphlet contains a careful and concise survey of agricultural conditions as they existed in Canada in 1935, together with statistical conditions as they affected agriculture, beneficially and adversely, and the prospective position of agriculture for 1936, including some specific conclusions which cannot fail to be of material aid to every farmer who reads it.

As the forward to this 52-page bulletin says: "This annual review of the position of Canadian agriculture contains basic information which will assist farmers in planning their operations for 1936, and, of course, impossible to take into consideration drastic changes in international affairs which might develop before the close of the year. The report, however, presents an analysis of the factors most likely to affect farm income in the coming year."

A particularly valuable feature of the report is the summarized conclusions published by the sub-committee with respect to each of the important cereal grains and the several divisions of livestock, together with the reasons which lead up to these conclusions.

One who reads the bulletin cannot fail to be impressed with the fact that, generally speaking, the position of agriculture has improved in the past year and that the factors in support of further improvement in 1936 are material, but it should be pointed out that the farmer who is carefully and intelligently studying the situation is the farmer who is in the best position to take advantage of this prospective continuing upward trend.

The pamphlet should be in the hands of every farmer in the prairie provinces and is worthy of study by all who are interested in the welfare of agriculture in the west and that means every citizen of the three provinces.

A Cape Cod Industry

Art of Making Bayberry Candles Has Been Revived

The old art of making bayberry candles has been revived on Cape Cod and many thousands of these fragrant little candles are now being sold. Bayberry candles may be found growing wild among the sand dunes and pine woods of the Cape. The candles are made by cutting the little gray-green berries in a large kettle and skimming off the wax that rises to the top. The wax is then dipped into the wax until candles are formed.—Boston Globe.

An Important Discovery

Doctor Chalmers Nerves Can Be Spun Like Artificial Silk

Nerves have been taken apart for the first time and spun back together again like artificial silk at the University of Illinois. The spinning method was disclosed as a result of work that was done in the manufacture of rayon. The experiments were performed in the X-ray laboratory of Dr. George L. Clark, internationally known chemist. Discovery was made of proteins, the chemist asserted, because it increased knowledge of nerve disease.

Be particularly—buy your flour by name. Purity Flour has enjoyed your confidence for thirty years. Always measure quality—sifted from the world's best wheat—ensures complete satisfaction for every kind of baking.

Best for all your Baking

If Heart Is Healthy

Operations On It Can Be Performed With Success

A news item from Philadelphia reminds us that the heart, when healthy, can stand a lot of punishment, and that surgeons are still performing marvels. A youth was stricken in a street argument and rushed to the hospital, where they put four stitches in his heart. He is reported to have a fair chance of recovery.

That a man may live after his heart has been placed is well known to surgeons. One of the most remarkable cases on record is that of Sir Arthur Sloggett, whose heart was pierced by a sharp pointed bullet from a rifle in the hands of a Mohd. rebel, at the battle of Khartoum. Sir Arthur lived 44 years after the wound. Another interesting case was that of a British war veteran who was wounded by a German bullet in 1917, and who lived with the missile in his heart for 13 years. He died of Bright's disease.

An operation as delicate as that performed on the Philadelphia youth was undertaken successfully by Dr. Claude S. Beck on a man suffering from angina pectoris. He severed the end of the pericardial muscle in the man's chest and fastened it to the wall of the heart to encourage the flow of blood, slowed down by the disease. Renouveau was a Canadian. Dr. Samuel Cleman, operating on a man, appendicitis, at a hospital, England. The patient's heart stopped beating, and Dr. Cleman swiftly and skillfully made another incision above the first, inserting his hand, he gently massaged the patient's heart, it started beating again and the man recovered.

Missionary Will Be Honored

Carved Out Pioneering Work

Among Indians At Coast

One of British Columbia's outstanding pioneer Indian missionaries, Rev. Charles Selkirk, D.D., will be honored in June this year with the unveiling of a bronze memorial statue in St. Andrew's Wesley United Church, in connection with Vancouver's golden jubilee celebrations.

Born in England, he worked there in his youth as a butcher-boy. He came to British Columbia at the age of 17 to make his home in the Cariboo gold mining fields, but was lured by miners in Victoria that the Cariboo Eldorado had been disappointing.

He then went to Nanaimo to work in the coal mines. Soon a strike of the miners broke him out of work and he began to visit with the Indians and to teach them the English language.

After he was given a position teaching the Indians and was paid \$25 per month. In 1879 he was ordained as a first Methodist conference in Victoria.

Mr. Tate translated portions of the scriptures into the Indian language; established a boarding school for Indian children at Sarnia, B.C., which later was called the Copeland Institute, and was one of the other pioneering work amongst the Indians.

He died in Vancouver in February, 1923, at the age of 80.

The Vimy Pilgrimage

Some Emigrants Granted Leave Of Absence With Pay

One event presently warming the hearts of transportation executives is the Pilgrimage to Vimy organized by the Canadian Legion for July, 1936. Some 5,000 are expected to participate, and the mission in France will conclude with the unveiling of the Vimy Memorial on July 26. Many have already shown their desire to co-operate with the boys who fought for us over there, by enabling them to take advantage of this opportunity. In some cases four to six weeks leave of absence with pay has been granted to ex-soldier employees. In their brief day they caught the torch, but it glows. We, in our way should help perpetuate the memory of those who passed it on.—Canadian Business.

A kitchen fire at a Saltergate hotel, one of the oldest inns in the North Riding of Yorkshire, England has burned continuously for 134 years. There is a legend that a local ghost, haunted under the fire, will rise if it goes out.

Argentina is not only rounding to destroy locusts, but is making tons of dried meal from the dead locusts, and exporting it for fertilizer.

All the radium that has been extracted from the earth would make only a two-inch cube, but it is valued at \$25,000,000. 2182

Different From Old Days

Passengers On P.S. Queen Mary Will Enjoy Refreshed Air

Anyone who has crossed to North America in an ordinary common or garden steamship will be surprised to find in one of its features will be smoked or smoked, according to temperament, by its occupants. What is to be done for the comfort of passengers in the Queen Mary? Perfumed air will be available for the ladies, who can, by a flick of the controlling lever, rid their rooms of cigarette smoke. The air in the cinema and kitchen will be purified every three minutes, while in the 26 public rooms the atmosphere will be continually changed.

This serves to mark the tremendous change that has taken place since the coming of the "luxury liners" on the Atlantic ferry.

What early cross-Atlantic travel was like may be gathered from Charles Dickens' accounts of his first trip to the United States. That was in 1842, and the vessel was an early Canadian, the Atlantic, a three-masted one-funnel paddle steamer of 1,500 tons burthen.

The Britannia had a rough voyage, and Dickens, in a passage of a letter to John Forster, which was suppressed from "American Notes," says: "I have never seen so sick since the first day, the noise, the smell, and the closeness being quite intolerable." The voyage was 51 days out from Liverpool.

In the "Notes" the novelist says: "It was not the seasickness, but the heat below. It was decidedly bad, and it was impossible to be unconscious of the presence of that extraordinary compound of stink and sweat which is to be found nowhere else but on board ship, and which is such a perfect nuisance to the passenger, entering at every pore of the skin, and whither of the hold."

There are differences from the no doubt still "subtle" but more identifiable perfume the Queen Mary's passengers are to enjoy—Manchester Guardian.

Many Piers Died Last Year

Debtors Shows Heavier Load Than For Half Century

One of the old facts I have dug out from the new volume of the Debtor's Index, which shows that the number of debtors has been heavier last year than for half a century.

There are 42 names in the almanac list, eight more than last year. You must go back to 1929, when 41 peers died, to find a comparable figure.

If you are interested in statistical information, you may note that the lightest death-rate in the peerage for 50 years was in 1902, when only twelve died.

Peers who have died during the past twelve months include two great war leaders, Lord Jellicoe and Lord Byng; two well-known politicians, Lord Bridgeman and Lord Gladstone; two eminent lawyers, Lord Atkin and Lord Tomlin; and two press magnates, Lord Riddell and Lord Dunsley.

Peers who have died during the past twelve months include two great war leaders, Lord Jellicoe and Lord Byng; two well-known politicians, Lord Bridgeman and Lord Gladstone; two eminent lawyers, Lord Atkin and Lord Tomlin; and two press magnates, Lord Riddell and Lord Dunsley.

WHAT TO DO ABOUT "Acid Indigestion"

A WAY THAT RELIEVES THE CAUSE IN A FEW MINUTES

Many people who find they have "weak stomachs," or "indigestion," doctors say, suffer in reality from nothing more serious than acid stomach. And this common ailment can usually be relieved, too, in minutes.

All you do is take familiar Phillips' Milk of Magnesia after meals. This acts to almost immediately neutralize the stomach acidity that brings on your trouble. You feel like a new person.

Try this just once. Take either the familiar liquid "PHILLIPS" or the new Phillips' Milk of Magnesia Tablets. But watch out that you get the Genuine PHILLIPS' Milk of Magnesia. Made in Canada.

4,000 50c TABLETS. This is the Phillips' Milk of Magnesia Tablets. You can't get it anywhere else. It's the only one. It's the only one. It's the only one.

PHILLIPS' Milk of Magnesia.

WORLD HAPPENINGS BRIEFLY TOLD

Nazi non-paganism was denounced in a pastoral letter read from the pulpit of every Roman Catholic church in Germany.

Canada this year and hereafter will celebrate the birthday of its new king Edward VIII. on June 23 without having to change the law.

Germany may expect a tax increase of 1,300,000,000 marks (approximately \$200,000,000) in the next fiscal year because of expenditures incurred rearmament. It was disclosed.

The immigration department was without information on the details of the plan to transfer 100,000 Jews from Germany, charged to Palestine, but also to other countries which had no anti-Semitic laws.

Twenty-three persons were killed and 60 injured when a snowslide rained a train east of Yamagata in northern Japan. Three coaches, in which engineers and railway workers were riding were thrown over a cliff.

Despite a temperature of eight below, Doc Carroll and his mate of the "Polar Bear" club took a dip in Lake Michigan. Carroll with his hands. He froze his hands and feet.

Establishment of the national commission on unemployment and relief will be delayed until parliament has had an opportunity to pass the necessary legislation and appropriation.

Prime Minister Mackenzie King announced.

Declaring that the relief cost per day for greater Winnipeg was very close to being the highest in Canada.

Hon. W. R. Clubb, provincial minister of public works, warned the Winnipeg city council that unless costs were kept down support of the federal and provincial governments may be withdrawn.

An old Chinese dinner service was sold recently in London for \$500.

British Broadcasting Co. Issues Call For Television Subjects

Wanted: A beautiful young woman, with boundless personality, rich, golden voice, excellent figure, charming smile, extraordinary memory, and "photogenic" features.

Such a woman will get the honor of being the first television announcer in England.

First tests at the British Broadcasting Company's new television station at Alexandra Palace are expected shortly.

The woman chosen must be exceptionally charming.

"Her face," it has been announced, "must photograph perfectly, she must have a good memory, for she will not be able to read her announcements. And she must meet with the approval of her own sex as well as men."

Licence Plates In Britain

Are Never Challenged But Colored Disc Indicates Reverse

Canadian car owners say that British car they stay there until the car is junked, no matter how long it is kept or how often it changes hands. The indication that new license is taken on is a colored disc fastened in a corner of the windshield, a different color being provided each year.

Usually Welcome

Teachers at Lawrence, K.B., were going to strike, but the government prevented it by making a grant to pay salaries. Teachers, of course, work because they love to teach and are interested in the future of the children, but it must be admitted there is a certain amount of joy to be found in an occasional pay envelope.

An astronomical observatory which once stood on Mont Blanc is abandoned, but a weather station is still maintained on the upper slope.

It is believed that hens produce fewer eggs in very cold weather because they eat less food.

A war never seems to go where there are names that are easy to pronounce.

The only thing that stands between man and international peace is man.

Crochet Tells an Accessory Story

PATTERN 5225

"Picture hat" one touch—this time with bags to match, and a boater set than this just could be imagined! You'll want it for your own when you learn how easily both may be crocheted. The hat with graceful, rolling brim, is just simple crochet. The brim is worked over outside band to stiffen it. The bag, too, of simple crochet has decorative lines of rib stitch worked on inside. It's lovely in a wool and rayon yarn.

In pattern 5225 you will find complete instructions for making the set. For an illustration of it, see the stylish accessories, material and trimmings.

To make this pattern send 20 cents in stamps or coin (not preferred) to: Household Arts Dept., Winnipeg Newspaper Unit, 275 McDermott Ave. E., Winnipeg.

There is an Alice Brooks pattern book published

Soviet Airman In Luck

Orders To Make Parachute Jump Turned Out All Right

A parachute wedding has been celebrated in a village 80 miles from Moscow. The bridegroom, Michael Ivanovich, a Soviet airman, had arranged to be married when all leave was cancelled for parachute maneuvers. They began on what was to have been Ivanovich's wedding day. As he took off, he was handed orders giving the place for his parachute jump. The seal was not to be broken until he was in the air. Up went the machine. Just Ivanovich tore open the official envelope. He could hardly believe his eyes—the place given for his descent was the village where he was to be married. No parachutist could have been more eager to obey his orders than Ivanovich. He landed safely from the skies at the feet of his bride—who had run from her house to watch the air manoeuvre. Before evening they were married.

Locate Buried Church

Diggers Found Bell Which Will Be Used Again

Lost for 40 years until found recently by divers, a bell buried when Wairoa, New Zealand, was blotted out by the eruption of Mount Tarawera, has been dug up and will be hung in another Maori church. Two men, using rods from a tree, walked over the ground where the church was buried in 1886 until they found the spot where the bells indicated that buried metal object was beneath the ground. Diggers found the bell buried deep.

Scoping Eclipse From Air

Astronomers Will Make Observations

In Banks June 19 Observations of the solar eclipse on June 19, 1936, which will be visible over a wide area in the Soviet Union, will be undertaken from airplane and sub-robotic balloons. Fifteen Soviet scientific expeditions will be stationed along the path of the eclipse. Astronomers from the United States, England, Germany, Denmark, and Japan have asked permission to conduct independent observations there and others are expected to apply.

Preserving Wild Life

The Jack Miner Migratory Bird Foundation, Inc.

Looking into the future naturally every interested person wonders what will happen to the Jack Miner bird sanctuary. To be brief several forethoughtful Canadians and Americans have been the cause of incorporating what is known as the Jack Miner Migratory Bird Foundation Inc., with the hope that men and women who are not able now to contribute several thousand dollars to same will remember this old foundation in their wills and make a bequest to this said Jack Miner's where bird life can be seen in its natural haunts!

To give a better explanation of the idea of the Jack Miner Foundation the following is an article which appeared recently in a Canadian publication:

Every person who has visited the Jack Miner bird sanctuary, or read its history, would be under the impression that it is being accomplished there, naturally asks: "What will become of the sanctuary if there are no more birds in Canada or the United States, the question is answered, 'There has sprung into existence an organization that will try and raise money to perpetuate the work begun by Jack Miner personally. This organization is known as 'The Jack Miner Migratory Bird Foundation, Incorporated, and has entered into an agreement with the Toronto General Trust Company, and any other trust company the contributor wishes to name, to accept contributions and to hold them for that purpose, so that money from the said trust or endowment fund will always be available, both during the balance of Jack Miner's lifetime and afterwards, to feed and care for birds in the Jack Miner sanctuary."

It is the plan of the foundation that as soon as sufficient money has been contributed to the upkeep of the property in perpetuity that Jack Miner will, on his part over the sanctuary to the Jack Miner Migratory Bird Foundation, Inc. And it is further provided that upon the death of the present trustee, the money in the fund shall be divided into two equal parts, one to be held by a committee of two composed of the present trustee and the president of the United States at that time.

To the person of means, interested in God's great out of doors, let us say that you could put a small proportion of your wealth so that it would do more good than in the Jack Miner Migratory Bird Foundation. If you have been interested in the work of Jack Miner, and in carrying on for years, practically all his own energy, in the work of the sanctuary, you will find it a noble purpose to do you think your means could be devoted than that of the foundation. If you have been interested in the work of Jack Miner, and in carrying on for years, practically all his own energy, in the work of the sanctuary, you will find it a noble purpose to do you think your means could be devoted than that of the foundation.

"Caveat Emptor"

—an old Latin phrase, mean-
ing, literally, "Let the Buyer
Beware," and expressing con-
cise the basic upon which
most business was transacted
in early Roman days—the
Buyer's Risk.

Times have changed since
that momentous era, for
tamely, most business is
transacted on a "builder's
standard." The Buyer—the
Customer—is actually pro-
tected today by the merchan-
dise from which he makes his
purchase.

This policy finds no higher ex-
pression anywhere than in the
EATON Catalogue. ACCU-
RACY of statement and illu-
stration, regarding every item
presented, is a watchword of
every EATON publication.
Every line of description is
checked and double checked
to ensure that no misstate-
ment, exaggeration or over-
emphasis occurs. Where there
is any doubt, the statement in
question is left by scientific
analysis and PRAYED correct
before it is permitted to ap-
pear.

It's extra trouble, of course,
takes more time and costs
more money. But it's well
worth while to us to have
hundreds of thousands of
Western men and women
happy at their feet, that we
SAFELY to buy from EATON'S.

Interesting Local Items

Watching the mercury ap-
pears to be the principal out-
door pastime these days.

Redcliff has been very fortunate
with its gas system this
severe weather. There have
been no accidents and the pres-
sure is standing up nicely.

The Little Theatre entertain-
ment was postponed again on
account of the severe weather
but out for the new date and
don't miss it as a good program
is assured.

During the cold spell many
were kept busy keeping their
water pipes thawed out. Sever-
al householders have had to
carry water from their neigh-
bors.

Mr. Anton Anderson, of the
Towell district, was found un-
conscious in his shack suffering
from a stroke. He passed away
in the hospital last Thursday.
Deceased lived alone and was 60
years of age.

Brooks has had a nasty ex-
perience with its gas supply
during the cold snap. Gas lines
rose up and many had to resort
to the old coal stoves and fur-
naces. Fortunately the CPR
had a good supply of coal on
hand and served it out liberally.

This February so far has
seen the coldest on record and
will be even if it turns milder
over. The average temperature
for the first 18 days was 23.5
below. On one occasion it went
down to 48 below and for several
days it hovered around from
40 to 45.

BIRTHS

Bradley — In Medicine Hat hos-
pital on Saturday, Feb. 15th
1936 to Mr and Mrs. Irwin Brad-
ley, a daughter.

The School Bill and the Social
Credit Enabling Act will be in-
troduced in the legislature next
week.

Provincial treasurer, Cockroft
reveals the fact that Alberta's
debt obligations maturing this
year total \$21,280,000.

Don't fail to get a good educa-
tion while your young. It will
come in handy when you have to
help with your children's home-
work.

It might be a good idea for
residents in town to keep an eye
on their chimneys to see that
they do not get plugged up with
snow, so that the fumes, from
the stoves can have a clear out-
let.

Combed before spring work
starts \$2,750,000 will be distrib-
uted among 27,000 Alberta
farmers in the move by the fed-
eral government to equalize the
initial payment of the 1936
wheat crop at the terminal price
of 60 cents a bushel.

School Inspector Sweet made
an official visit to our school
last week end.
